**Product Features**  
Automatically / manually select the optimum charging current  
By default, the charger automatically selects the optimum charging current according to the battery characteristics. You can also set the charging current manually (Max 1.5A, Min 0.1A).  
Accurate capacity measurement(only 4th slot)  
Put the battery into 4th slot, it can measure the actual battery capacity through the process of charging-discharging-recharging. The discharging current range is 0.1A-0.4A.

- Automatically recognize Li-ion battery (4.2V), NiMH/Ni-Cd battery(1.48V).
- Automatically measure battery internal resistance & battery capacity.
- Support 4 slots charging independently without interference, support small capacity battery charging.
- Add-ΔV Judging fully charging method for NiMH / Ni-Cd battery.
- Automatically stop charging when fully charged to avoid over charging.
- Two voltage input options DC12V & AC90~260V, Available for car charger.
- Automatically activate and repair "0 voltage" lithium battery.
- Reverse-battery and short circuit protection.
- Automatically calculate the battery percentage.
- Automatically match the best charging current according to the characteristics of the battery.

**Product Parameters**  
Input Voltage: AC90-260V 50/60Hz  
DC12V / 2A  
0.4A(Max)  
Output Voltage: 4.35V±1% / 4.2V±1%  
3.6V±1% / 1.48V±1%  
Output Current: Max:1.5A\*2 / 1.5A\*3 / 1.0A\*4  
Size: 167\*108\*41mm

**Full Compatibility**  
Li-ion(4.2V / 4.35V) / IMR / ICR / LiFePO4(3.60V)  
10340 / 10350 / 10440 / 10500 / 12340 / 12500 / 12650 / 13450 / 13500 / 13650 / 14350 / 14450 / 14500 / 14650 / 16500 / 16540R-  
CR123) 16650 / 17500 / 17650 / 17670 / 18350 / 18490 / 18500 / 18650 / 18700 / 20700 / 21700 / 22500 / 22650 / 25500 /  
NiMH / Ni-Cd(1.48V)  
A / AA / AAA / AAAA / C / SC

# DAVINCI®

## 4 Slot Digital Battery Charger

- 15A FAST CHARGER
- SUPER COMPATIBILITY
- 8S FULL AUTOMATIC
- TRIPLE PROTECTION
